

RISK MANAGEMENT OPTION

Professional Project Risk Management and Reporting

ONEPOINT's Risk Management Option provides project managers with the ability to professionally manage the risk portfolio including risk description, probability and impact for each projects. Optionally, global risk categories can be defined to make risks comparable across projects.

Minimize insecurities, variables and unidentified risks through early risk identification, evaluation and response planning by assigning activities of the project plan already in the project start process

Reduce costs and ensure project success through faster reactions, shorter processing times and transparency by continuous risk controlling activities

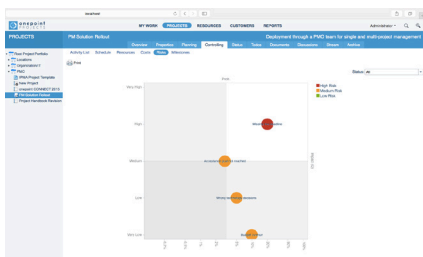

Minimize risk probability and impact by defining global risk categories to make risks comparable across projects and use synergies from other projects

Efficiently support management decisions through transparent risk visualization with automatically generated bubble charts and customizable risk reports

FEATURES
