

STATUS REPORTING OPTION

IPMA-compliant Project Status Reporting

ONEPOINT's **Status Reporting Option** provides a **fast and effective way of ensuring regular project status reporting**. Management reporting is facilitated via a traffic lights-based status overview and IPMA-compliant, printable PDF reports such as project charter and project status.

Ensure fast and effective project status reporting through access to up-to-date project information via a centralized, digital and revision-safe project handbook

Optimize management decisions through timely status updates supported by configurable status reporting intervals

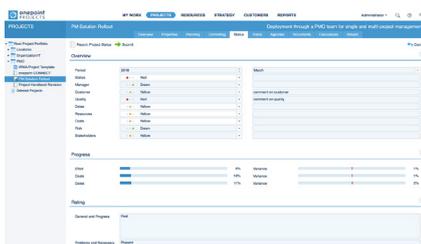

Improve overall control of project progress through fast reactions to potential issues and high transparency of detailed project status

Reduce costs and administrative efforts for project managers through faster status report generation based on already existing plan, actual and progress information

FEATURES

- ✓ Revision-safe and integrated IPMA-compliant management of the project handbook in a central project repository
- ✓ Creating document-style IPMA standard reports including project charter, work instruction, project progress and project closure
- ✓ Quick documentation of project status including traffic light comments, general status information, milestone comments and trend analysis for each reporting interval
- ✓ Clear portfolio status overviews based on traffic lights and project pipeline
- ✓ Automatic, half-automatic and manual traffic lights that are easily configurable
- ✓ Flexible status reporting intervals per project type
