

CONFLUENCE CONNECTOR OPTION

Embedding real-time PPM information into Confluence

ONEPOINT's **Confluence Connector Option** allows embedding **real-time project and portfolio views** into any Confluence page using special macros. Available views include work breakdown structure (WBS) and schedule (Gantt) on the project level, as well as project pipeline on the portfolio level.

Improve project transparency through better visualization and communication by including real-time project planning charts directly into your project documentation

Make transparent and value-based decisions by collaboratively discussing your project pipeline chart within Confluence

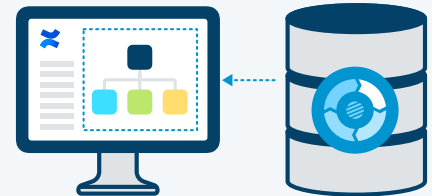

Reduce administrative efforts and costs for project team and stakeholders and improve documentation through direct access to real-time views in Confluence

Ensure fast and effective project reporting by quickly accessing project and portfolio information via clear and consistent visualizations of project data

CONFLUENCE

ONEPOINT

FEATURES

- ✓ Embedding of real-time ONEPOINT project and portfolio views into Confluence
- ✓ Highly visual project planning views including WBS and schedule (Gantt) on project level embedded into any Confluence page

- ✓ Transparent portfolio overview visualized by ONEPOINT's project pipeline for any Confluence page
- ✓ ONEPOINT permissions are also respected in Confluence
