

JIRA CONNECTOR OPTION

Integrated Project Portfolio & Resource Management for Jira

ONEPOINT's Jira Connector Option provides a real-time, bidirectional integration between ONEPOINT and Atlassian's Jira. By incorporating the synced data into ONEPOINT's integrated multi-project database, it is possible to extend Jira seamlessly with standards-based project portfolio management as well as resource planning.

Faster starting and staffing of projects through an always up-to-date resource utilization view across all projects and portfolios supported by and closely integrated with the skills management function

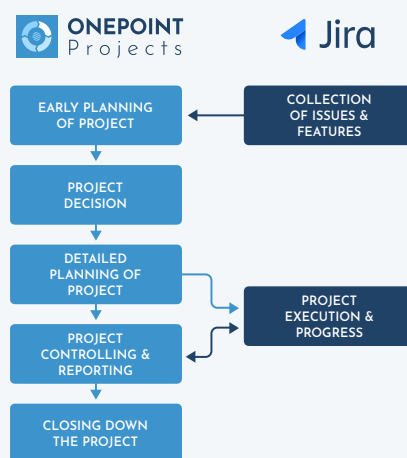

Minimized overall project risk due to better and more informed decisions based on consistent, real-time information across all projects through bidirectional synchronization of project data

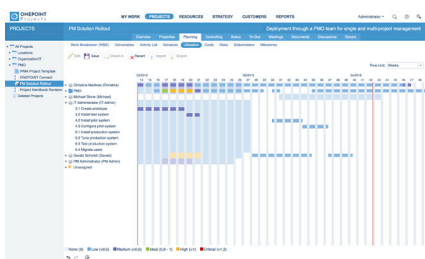

More efficient project execution due to improved communication through clear visualization of project structures and statuses with standardized project management charts

Optimized project administration costs via maximum reuse of entered information and quick documentation with flexible, standards-based project reports

FEATURES

- ✓ Clear overview of all projects in a highly visual, configurable "Project Pipeline" complete with IPMA-compliant traffic lights
- ✓ Real-time synchronization and aggregation of agile Jira project data into ONEPOINT's multi-project database
- ✓ Resource planning for Jira projects through a real-time resource utilization view for resources and teams across all projects
- ✓ Interactive WBS and GANTT planning for Jira issues including dependencies; additional standards-based PM charts available (e.g., Earned Value)
- ✓ Improved project effort and cost planning for Jira issues and features with automatic calculation of personnel costs and proceeds
- ✓ Optional IPMA-compliant periodic status reporting, risk management, stakeholder analysis, program management, and portfolio analysis for Jira projects
