

PLANNING & CONTROLLING OPTION

Standards-based Detail Planning & Controlling

ONEPOINT's Planning & Controlling Option facilitates standards-based (PMI, IPMA, PRINCE2) project planning and controlling. Take advantage of the interactive and intuitive planning tools and experience functional controlling views. Standards-based project planning and controlling has never been easier.

Remain within budget by minimizing administrative efforts through automatic data transfer and functional controlling views to optimize processing time

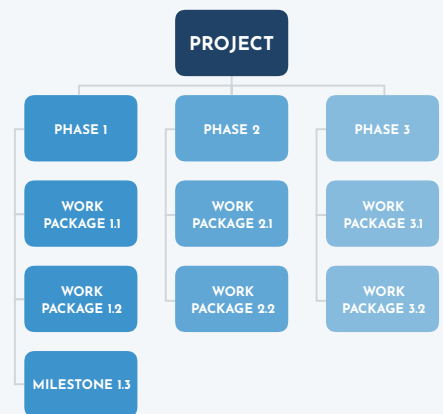

Minimize project failure by assuring quality in project management through an integrated project view and immediate reactions by planning changes with real-time updated controlling charts

Faster time to market through efficiently planning and controlling of projects and adhere to deadlines in all phases of the project with a transparent work breakdown organization and interactive scheduling

Effectively manage resources by realizing workload changes and absences quicker with visual resource planning supported by an interactive resource utilization planning view

FEATURES

- ✔ Interactive work breakdown structure including four different view types (simple, effort, scheduled, progress)
- ✔ Drag & drop enabled interactive Gantt chart with different view types and customizable category colors
- ✔ Interactive planning view for resource utilization optimization and conflict resolution
- ✔ Real-time updates of milestone trend analysis
- ✔ Automatically updated effort and cost-based Earned Value charts including actual and planned values
- ✔ Further licensable ONEPOINT options such as Stakeholder Analysis, Risk and Program Management
