

PORTFOLIO ANALYSIS OPTION

Integrated Project Portfolio Analysis & Prioritization

ONEPOINT's Portfolio Analysis Option integrates strategic portfolio analysis and project prioritization deeply within its multi-project and resource management data model. Rating projects using both top-down and bottom-up criteria linked to real-time project fields creates a new, dynamic and modern PPM approach.

Ensure ongoing project alignment to strategic goals with a holistic approach through fast access to clear portfolio visualizations based on centralized business criteria

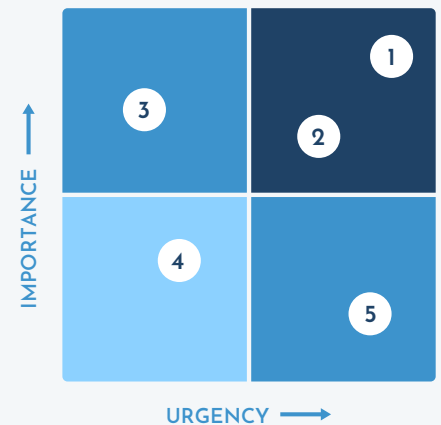

Better informed strategic project decision-making based on unusual insights through unique, multidimensional portfolio visualizations and thus contributing to overall portfolio success

Monitor and optimize resource allocation to important projects by leveraging the advantage of integrated top-down and bottom-up project portfolio management

Increase product innovation and quality of deliverables through easy capturing, rating, and prioritizing of project ideas and running projects

FEATURES

- ✔ Support for both manually-rated (top-down) and dynamic real-time criteria (bottom-up) based on built-in project fields
- ✔ Optional, separate scoring models on portfolio levels (company vs. departments)
- ✔ Tabular portfolio visualization featuring sortable columns per criteria and weighted overall score based on current scoring model
- ✔ Highly dynamic and configurable bubble chart visualizations (x-axis, y-axis, bubble size and color)
- ✔ Unique dynamic project symbols visualizing up to twelve project dimensions simultaneously
- ✔ Project evaluation and portfolio analysis support for all kinds of projects (simple, traditional, agile, and Jira projects)
