

STAKEHOLDER ANALYSIS OPTION

Revision-safe Stakeholder Management and Analysis

ONEPOINT's Stakeholder Analysis Option allows for **revision-safe stakeholder management with respective measures** to ensure a sustainable and positive relationship with your project stakeholders. The controlling component provides a visual stakeholder analysis based on power, interest and attitude.

Identify, document and analyze your key project influencers and opponents by performing a stakeholder analysis and effectively manage their interests by implementing respective measures

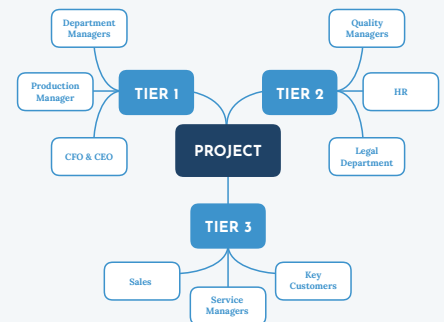

Prevent additional project costs through a holistic and systematic approach by recording all factors influencing the project supported by a clear visualization of your stakeholder environment

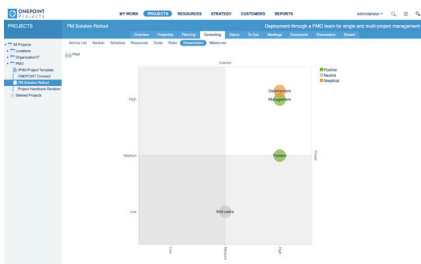

Perform quick prioritization through interactive stakeholder engagement planning while optimizing communication with stakeholders by facilitating fast responses to their needs and interests

Ensure project success by constantly monitoring the stakeholder environment and modifying your stakeholder plan and measures to ensure continuous alignment and improvement

FEATURES

- ✓ Revision-safe stakeholder engagement planning including stakeholder name, responsibility, power, interest and attitude
- ✓ Definition of stakeholder measures with responsibility and optional due dates
- ✓ Optional linking of phases, work packages, or milestones to stakeholders and measures
- ✓ Easy controlling of measure status
- ✓ Three-dimensional stakeholder analysis based on power, interest and attitude
- ✓ Optional configuration of stakeholder traffic light for overviews and status reporting
