

STRATEGIC MANAGEMENT OPTION

Linking Strategic Planning & Controlling to Project Execution

The Strategic Management Option allows top management to plan, communicate, and control their strategic vision. You can then break this vision down into goals and initiatives, and implement these by linking them to one or more strategic projects. Thus, making it possible to directly connect strategy to project execution and reduce barriers to strategy implementation.

Maximize management impact by consistently aligning all resources to your strategy through clear communication of a single vision, prioritized goals and strategic initiatives

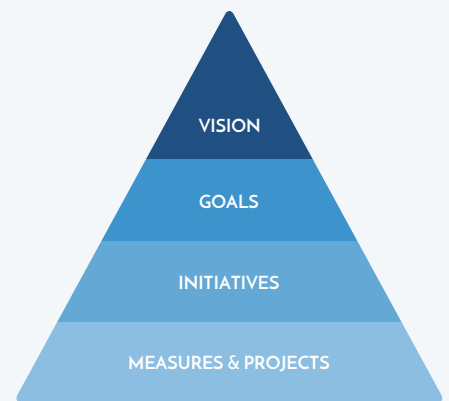

Minimize organizational risk through ongoing controlling of initiatives status and progress as well as real-time status aggregation based on linked strategic projects

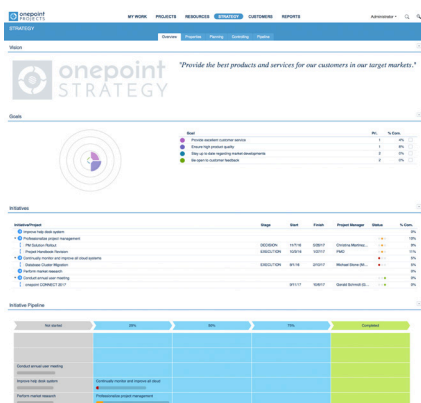

Realize new profits faster by communicating changes more quickly and making success of strategic initiatives measurable and reportable

Cut change management costs due to faster changes through clear focus on projects linked to strategic initiatives and goals

FEATURES

- ✓ Clear dashboard visualization of your organization's vision, strategic goals, and initiatives
- ✓ Automatically aggregated status traffic lights for initiatives based on linked projects
- ✓ Planning of your organization's strategy based on vision, prioritized goals, and initiatives
- ✓ Goal completion chart based on actual progress of strategic projects and initiatives
- ✓ Seamlessly integrated strategic controlling with goal completion, progress, and traffic light status
